

Student Placement (Stage M2/Ingénieur) – Front End or Full Stack Developer

Cellenion is a young and fast-growing team dedicated to **precision and speed in single-cell** analyses in **Lyon, France**. We are part of the CELLINK group.

CELLINK is a global leading in bio-convergence company, equipping hundreds of labs and thousands of scientists worldwide with cutting edge technologies to contribute to the future of medicine.

We are driven by three mantras: **passion, inspiration, and persistence**.

Do you want to join a company that develops cutting-edge products for the life science industry? Do you love to work in an interdisciplinary and international team of highly skilled, and energetic people?

We are looking for a **front end or full stack software developer** who is **passionate** about developing **user friendly software for complex workflows**. You will work closely with our team of software developers and scientists to enable a great user experience with our solutions. We are convinced that a **great UX** and **outstanding UI design** are key to the successful integration of cutting-edge and complex technologies in the scientific and medical world. Be part of the future and join our amazing team.

Qualifications

- Good knowledge of UX/UI design and implementation (.NET/C#, WPF, XAM)
- Good knowledge and experience with backend development .NET/C# (C++ is an advantage), Visual Studio IDE is used
- Experience with Python would be a plus
- Strong problem-solving skills
- Ability to work in an international and a multidisciplinary team

Responsibilities

- Develop a workflow for biotechnological applications
- Learn from senior software developers
